-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 12 and 13 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Greenwood *et al.* (US 2001/0004927).

Greenwood *et al.* discloses an acidic silica sol, obtained by mixing water glass with a mineral acid (paragraph 0022), which have an S-value ranging preferably from 15 to 40%, more preferably from 20-34% (paragraph 0015). The silica content is at least 3 weight percent (paragraph 0016), which would fall within the present range of 1 to 25 parts by weight silica to 100 parts acid. While this is not the present process, in which the sol with a recited S-value is mixed with a mineral acid, this would produce a product falling within these product claims, a mixture of silica particles and a mineral acid. While Greenwood *et al.* do not disclose a diameter for the silica particles, the specific surface area range (paragraph 0013) is the same as presently disclosed and claimed. Because of this, and because specific surface area is related to particle size, the present size range would be inherent to the silica of Greenwood *et al.*

Claim 11 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. This claim recites “providing a composition according to claim 1”, but claim 1 is not drawn to a composition, but to a method.

Claims 1-9 are allowed. Applicant's arguments have been found persuasive with respect to these method claims.

Applicant's arguments with respect to claims 11-13 have been considered but are moot in view of the new ground(s) of rejection.
